WORK EXPERIENCES

Management Staff (Internship)

PT. Mahir Trans Bersaudara | Feb - Jul 2025

- Supported daily office operations including data processing, documentation, and preparation of internal reports, helping streamline administrative workflows and improve task efficiency.
- Redesigned the company logo to strengthen brand identity and ensure consistent visual use across digital and printed materials.
- Planned the website structure, user flow, and content layout to support future development of the company's official website, contributing to a clearer information framework.

- Developed a draft version of the company website as part of the company's digitalization initiative, providing a foundation for future deployment and online presence.
- Organized and archived company documents to improve accessibility and reduce search time, resulting in more efficient daily operations.
- Verified administrative data and supporting documents before processing, helping minimize inconsistencies and errors in internal records.

Vulnerability Assessment

Lecturer Research | Nov 2023 - Feb 2024

- Performed systematic scanning of website vulnerabilities using appropriate tools and methodologies, helping identify potential security weaknesses early in the research process.
- Conducted manual verification of automated scan results to ensure accuracy, reducing false positives and improving the reliability of the assessment.
- Documented findings with clear technical explanations, detailing risk levels, affected components, and potential impacts to support further academic analysis.
- Prepared comprehensive work reports, including analysis, screenshots, test results, and supporting documentation. Which contributed to a more structured and evidence-based research output.
- Reviewed technical references and security documentation to support the interpretation of identified vulnerabilities and strengthen the research analysis.

Administrator

Gudang Hoster | Jul 2022 – Feb 2023

- Managed and maintained website content, including product details, promotional materials, and service updates.
- Promoted hosting packages and website development services via digital marketing channels.
- Created SEO-friendly articles, descriptions, and blog content to increase website ranking and user engagement.
- Assisted customers by answering inquiries, providing product explanations, and guiding them through the purchasing process.
- Monitored basic website performance and content effectiveness to support continuous content optimization.
- Organized and maintained digital assets, documentation, and website data to ensure efficient administration.
- Assisted in preparing product comparison or service information, helping customers understand differences between available products.
- Updated promotional information across relevant digital materials when services or offers changed, helping maintain consistency in customer-facing information.

IT Helper (Internship)

PT. Radiant Utama Interinsco Tbk | Mar – Jul 2020

- Assisted the HR department in entering and organizing job applicant data into company records, helping maintain accurate and structured recruitment information.
- Assisted in preparing reports, documentation, and administrative tasks for the IT and HR department, which improved the accuracy and organization of internal records.
- Supported the IT team in managing and maintaining company infrastructure including hardware, networks, and office systems, resulting in smoother daily operations and reduced system downtime.
- Performed basic troubleshooting and device setup, increasing employee productivity by resolving technical issues more efficiently.
- Provided on-site support during IT tasks and infrastructure activities, enhancing team coordination and workflow effectiveness.
- Assisted non-IT employees with basic computer, application, and workplace technology issues, helping them resolve day-to-day technical difficulties and continue their work efficiently.
